Market Turned Out Better in Tone and Distribution of Bus-

YEW YORK, June 7.-The professional contingent in the stock market today started with very discouraging views of the hopes of any activity in ne market or of any movement of prices. ut the market turned out better in tone nd distribution of business than was the ase under the stimulating influence of esterday's rise ir Ontario & Western. It ald be difficult to fix upon a specific suse for this development, as the curent news seemed to have little influence

The weekly bulletin on the crops of the weather hureau proved rather more farorable than was expected on wheat for
both the winter and spring crops, and the
avorable progress of the cotton crop went
o accentuate the effect of the Government report of the June I condition of the
trop. The bulletin was less hopeful as to
he corn crop, but the maturity of that
trop is still so far distant as to detract
from the importance attached to its presmut condition. Favorable progress for the
rops is better calculated than any other
evelopment to settle the fluctuating opinwover the business prospects of the
finity. Hope seems to be thus engentred that the prescut lower plane of busicess and industry may be acvertheless on
firm basis, with reasonable assurance
against a progressive decline to a level
of prestration. eather bureau proved rather more fa-

a firm basis, with reasonable assurance against a progressive decline to a level of prostration.

The rather constart ratio of the decline in railroad earnings goes to establish this feeling. 'A late recovery in Ontario & Western today produced more effect elsewhere in the market than did vesterday's more sensational advance, and the kindred coalers were especially affected. The market was atill far from being a broad one and was almost wholly in professional lands so far as could be perceived. The personality of the brokers employed in the late buying conveyed an impression that some of the larger interests were taking stocks, and the sensational effect of the buying was thus enhanced.

The money market was almost stagmant and rates were inclined to droop, though with little money offering at the present unattractive rates. The advance in the steriling rates at Paris 25f 17½ was a decisive indication that the course of capital was no longer drawing toward that center. Incoming gold to the London market was accordingly taken by the Hank of England with no demand for Paris account. The discount market was yielding both in Paris and London. The market for sterling here also yielded, thus deferring, fingt avoiding, an outgo of gold to Lendon from here. Prices eased off in the final dealings, but the close was steady. The bond market was irregular, with weak spots among the lower-grade bonds. Total sales, par value, 51.745.99. United ak spots among the lower-grade be tal sales, par value, \$1.745,090 Usites bonds were unchanged on call.

APPLES, PLUMS AND **GOOSEBERRIES IN**

New Arrivals on the Fruit Market-Utah Poultry Is Now Plentiful and Will Be Cheaper.

MORE fruit came in yesterday from California and the indications point to a plentiful supply of home-grown produce. The wholesale houses announced to their customers yesterday that they had red Astrachan apples at \$2 a crate. Yellow plums also came in at the same price, and some early gooseberries. crate. Yellow plums also came in at the same price, and some carly gooseberries were put on the market. These are to be sold for the next few days at \$1.75 a case; at this stage of the season they are naturally quite green; when they get riper they will in due coure be cheaper. The berries that came in yesterday from the Hood river district were of an inferior quality, so much so that some of the dealers declined to take the risk of sending them out to their customers out of town. Utan strawberries show up so well by comparison that the demand for the Oregon product is falling off somewhat. The end of this week will see a great fall in all kinds of berries, as the home product will be rushed in in such quantities that the others will have to be reduced in order to hold the market.

Utah poultry is being brought into Salt Lake in large quantity. Home-raised poultry is so plentiful that one of the largest commission houses filled all its orders in the city for the last two days without any Eastern shipments, and besides this most of the restaurants have been buying from the producer direct. Either on Saturday or at any rate by the beginning of next week the prices will be reduced. Some say that the fail will be considerable. Live broilers for one will have to come dawn and a general reduction is certain. same price, and some early gooseberries

available stocks of 4,000,000 bushels. There was some reaction on selling due to expectations of a bearish Hilinois crop report, but the declining tendency was soon checked, and prices again started upward. Strength of corn was a help to the late wheat market. Just before the close reports of a big crop in Manitoba caused some realizing, resulting in another setback. Sentiment, however, continued firm. The high point on July was reached at \$84,0554c. The close was at \$94,854c. Clearances of wheat and flour were equal to \$5,200 bushels. Primary receipts were \$22,100 bushels, compared with \$21,900 bushels a year ago. Minneapolis, Duluth and Chicago reported receipts of \$24 cars, against \$10 cars last week and 204 a year ago.

Oats were called a small decline in wheat at the opening, initial sales of July being down 84c to 1474c. On active demand for shorts and good commission-house buying, sentiment soon changed. Much smaller receipts in the Northwest had an important bearing on the carly situation. The tenor of crop news from the Southwest also was generally considered quite buillish. An official forecast of more showers for that section brought out additional buying orders. Offerings, however, were not largee, and as a result prices steadily advanced. Under active covering by shorts a rally of about a cent occurred in corn. The market closed almost at the highest point of the session. July opened a shade lower to 1405c, sold up to 1505c, sold up to 1505c, and 1505c, sold up to 1505c, and 1505c, contract grade. Oats were quite dull but stubboroly firm.
